Allowable Subject Matter

Applicant's arguments filed 7/27/2006 with respect to claims 1, 14, and 15 have been fully considered, and found persuasive. Thus, claims 1, 3-5, 7-19 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1, 14, and 15 recite a method for manufacturing a plastic barrel comprises the electrically conductive sections form electric connections between the inner surface and the outer surface of the barrel body, wherein the electrically conductive sections of the barrel body have a thickness matching a wall thickness of the barrel body. The references of record do not teach or suggest the aforementioned limitation, nor would it be obvious to modify those references to include such limitation.
